Healthcare Data Analyst | AI-Enabled Analytics

Senior Healthcare Data Analyst / Business Intelligence Professional with extensive experience leveraging AI-enabled analytics, advanced reporting, and data visualization technologies to transform complex healthcare and business data into actionable insights that drive strategic decision-making, operational efficiency, and cost savings.

Experienced in healthcare claims analytics, provider performance, utilization analysis, dashboard development, and enterprise reporting using Databricks, Tableau, Microsoft Power BI, SQL, Python, SAS, Looker, and other enterprise BI tools. Skilled in leveraging AI-enabled technologies including Databricks Genie, Microsoft Copilot, Cursor AI, prompt engineering, and automation tools to optimize workflows, accelerate reporting, enhance analytics, and improve business outcomes.

Recognized for delivering valuable analytical insights, solving complex business problems, improving operational processes, and effectively communicating data-driven recommendations to leadership and cross-functional teams in fast-paced enterprise healthcare environments.

Areas of Expertise

- Healthcare Analytics & Claims Analysis
- AI-Enabled Analytics & Automation
- Databricks & SQL Development
- Tableau & Power BI Dashboard Development
- Data Visualization & Storytelling
- Provider & Utilization Analytics
- Operational & Executive Reporting
- Python, SAS & Data Engineering
- Business Intelligence & Data Warehousing
- Process Improvement & Reporting Optimization
- Cross-Functional Collaboration
- Strategic Decision Support

PROFESSIONAL EXPERIENCE

Cigna, Nashville, TN Aug 2017 – Present
Business Analytics Advisor

- Serves as a Senior Healthcare Data Analyst and Claims/Data SME supporting complex analytics initiatives related to Total Medical Cost, healthcare claims, provider performance, quality improvement, and operational reporting.
- Leverages advanced analytics, AI-enabled tools, and business intelligence technologies to identify trends, uncover cost-saving opportunities, improve operational efficiency, and deliver actionable insights that support strategic decision-making.
- Partners with cross-functional business and leadership teams analyze healthcare data, communicate analytical findings, identify improvement opportunities, and provide data-driven recommendations.
- Utilizes Databricks Genie, Microsoft Copilot, Cursor AI, prompt engineering, SQL, Python, and automation technologies to streamline workflows, optimize reporting processes, automate documentation, and enhance healthcare claims analysis.
- Develops executive dashboards, provider analytics, utilization reporting, and operational reporting solutions using Databricks, Tableau, Microsoft Power BI, Looker, Altair Analytics Workbench, SQL Server, SAS, Python, and Excel.
- Supports AI-assisted healthcare analytics initiatives involving cost containment, fraud detection, provider analytics, utilization management, and reporting optimization while ensuring data accuracy, integrity, and quality.

naviHealth, Nashville, TN Dec 2016 – Jul 2017

SENIOR REPORTING & VISUALIZATION ANALYST

- Served as a Senior Data Analyst supporting internal and external reporting, analytics, and data visualization initiatives to drive business performance and strategic decision-making.
- Developed interactive dashboards, drill-down reporting, and analytical solutions using Tableau, SSAS, PerformancePoint, SQL, and other BI technologies to transform complex data into actionable insights.
- Partnered with business, analytics, and IT teams to understand data flows, define reporting requirements, ensure data integrity, and deliver scalable analytics solutions.
- Performed advanced data analysis and visualization to identify trends, solve business problems, and communicate meaningful insights and recommendations to stakeholders and leadership.
- Designed user-focused reporting and analytics solutions including dashboards, ad-hoc reports, data extracts, and data discovery tools to improve operational efficiency and support informed decision-making.
- Utilized SQL and analytical techniques to support reporting automation, business intelligence initiatives, and CMS reporting requirements.

AdvanceMed (NCI), Nashville, TN Jan 2015 – Dec 2016

BUSINESS SYSTEMS ANALYST III

- Provided technical development expertise supporting mission-critical Business Intelligence and analytics initiatives, delivering valuable insights to support operational and strategic decision-making.
- Analyzed business requirements and developed reporting strategies, dashboards, and BI solutions to improve reporting efficiency and data accessibility.
- Designed, developed, tested, and maintained interactive dashboards, actionable reports, database objects, and analytics solutions using SSRS, SSAS, PowerPivot, SQL Server, Access, and other Microsoft BI technologies.
- Developed SQL queries, tables, views, stored procedures, and user-defined functions to support reporting automation, analytics, and operational reporting needs.
- Collaborated with business leaders, IT teams, and key decision makers to identify reporting requirements, communicate analytical findings, and deliver high-quality BI solutions.
- Supported dashboard development, ad-hoc reporting, CMS reporting requirements, QA testing, and BI solution maintenance while ensuring data integrity and reporting accuracy.
- Assisted with automation and continuous improvement initiatives for enterprise Business Intelligence solutions using Microsoft SQL Server technologies.
- Contributed to a high-performing team recognized with a CMMI Level III Rating for process and quality excellence.

UNITED HEALTHGROUP, Baltimore, MD (Telecommute) Oct 2013- Aug 2014

SENIOR REPORTING ANALYST

- Developed operational reports, ad-hoc reporting solutions, and KPI dashboards using SSRS, PerformancePoint, SharePoint, and other BI tools to deliver valuable business insights and support data-driven decision-making.
- Created and automated SQL queries, reports, tables, and stored procedures using SQL Server and SSRS to improve reporting efficiency and operational analytics.
- Developed reports and analytics solutions utilizing Business Objects Web Intelligence and Crystal Reports.
- Imported and managed data from multiple sources including CSV, Excel, and text files to support reporting and analytics initiatives.
- Trained and mentored junior data analysts on PowerPivot, Power View, SSRS development, and reporting best practices.

MEDSOLUTIONS, Franklin, TN Nov 2012-Oct 2013

MEDICAL ECONOMICS ANALYST

- Provided analytical support and valuable business insights using healthcare data from 40+ insurance companies including The Cigna Group, Aetna, BCBS, HealthSpring, Bravo Health, and Neighborhood Health Plan to support sales growth, pricing strategy, and operational decision-making.
- Automated 50+ client reports and developed reporting solutions using SQL, SSRS, SSAS, PowerPivot, PowerView, SAS, and Tableau to improve reporting efficiency and analytics capabilities.
- Conducted savings forecasts, pricing analysis, baseline studies, and trend analysis across targeted medical cost categories, geographies, and business segments.
- Developed presentations and reporting deliverables to communicate analytical findings, trends, and recommendations to stakeholders, leadership, and policy makers.
- Created SQL Server stored procedures, imported data for QA testing, and supported data management and reporting initiatives.

ARDENT HEALTH SERVICES, Nashville, TN Feb 2009 - Oct 2012

DATA WAREHOUSE ANALYST

- Supported the development and implementation of a healthcare data warehouse, providing valuable analytical insights to support health plan operations, reporting, and strategic decision-making.
- Analyzed healthcare data using Oracle, SQL Server, SAS, Business Objects, SSRS, Crystal Reports, Excel, Microsoft Access, and other BI tools to support reporting, auditing, and operational analytics initiatives.
- Designed and maintained Business Objects Universes, interactive dashboards, SharePoint sites, scorecards, and key metric reports for health plan and hospital departments.
- Managed data implementation projects for multiple healthcare vendors including Ingenix, Express Scripts, Delta Dental, Facets, Trizetto, Jiva, and VSP.
- Developed SQL tables, views, stored procedures, cubes, complex SQL queries, SAS programs, and reporting solutions to support upper management, HEDIS reporting, data validation, and operational analytics.
- Trained analysts and report writers on reporting tools, report development, and data visualization best practices while supporting enterprise reporting and data quality initiatives.

HEALTHSPRING INC., Nashville, TN Jun 2008 – Jan 2009

DATA ANALYST II

- Developed dashboards, complex SQL queries, and Crystal Reports to identify auditing trends, provide valuable business insights, and support executive decision-making.
- Assisted department leadership in developing PowerPoint presentations and data visualizations for executive reporting and operational analysis.
- Created SQL Server tables, views, and stored procedures to support reporting, analytics, and data management initiatives.
- Trained team members on SQL Server Management Studio and Reporting Services to improve reporting capabilities and technical knowledge.
- Designed SharePoint intranet sites using HTML/DHTML and developed VBA applications to improve departmental productivity and workflow efficiency.

DATA ANALYST I Oct 2006 – May 2008

- Analyzed healthcare data and developed complex SQL queries, reports, and data extracts to provide valuable insights supporting operational reporting, fraud investigations, and healthcare analytics initiatives.
- Collaborated with the Special Investigation Unit and certified medical coders to identify potential medical fraud, abuse, and claims overpayments through data analysis and reporting.
- Managed SharePoint sites and supported reporting workflows to improve departmental communication and operational efficiency.
- Extracted and delivered healthcare data from SQL Server to vendors including Ingenix, iHealth, Vips, and StarSentinel to support analytics and business operations.
- Contributed to the recovery of medical claims overpayments through analytical support and fraud detection efforts.
